## METALS FEATURE STOCK TRADING

**Shorts Are Fored to Retire When Buying Becomes Inistent**

**NEW YORK, Oct. 1.**—Trading during today's brief stock market session was made up largely of metals, domestic oils, stocks, equipment and several of the conspicuous coal issues.

Corporate came one to two points in recognition of the higher prices quoted for future delivery, while seemed to derive their impetus mainly from pools and Graham Newby's further gain was associated with the company's prospective earnings position, which appears to have advanced in the first half but retarded when buying became too incisive to be ignored, a firm to strong tone marking the close. Sales 21,000 shares. Dealings in bonds were moderate. Liberty and Victory issues showed gains and losses at the end. Foreign issues were lower, except Cuba Cane 73. Total sales put value aggregated \$15,250,000.

An increase of \$55,000,000 in new bond and discounts by the clearing houses reflected the heavy transfer of funds incidental to the turn into the final quarter of the year. Reserves of members of the federal reserve bank system rose \$14,000,000 on a contraction of \$14,527,000 in cash holdings resulting in deficit of reserves of practically \$10,000,000.

Business in foreign exchange was nominal, but free pressure was directed against the British rate and German marks, the latter again declining to 75. Their lower rates in the markets manifested increased weakness with other central European rates. Far Eastern exchanges were steady. The Shanghai rate recovered its loss of the previous day.

**Standard Oil.** Following a price asked and quoting bid of Standard Oil Stock on the New York curb Saturday, as reported by Houston, W.H.C.,
